

A New Wave Of Perfection

Designed for retail gas and convenience stores, C-Store Commander point-of-sale (POS) systems with integrated pump control provide industry specific functionality. C-Store Commander improves your store operations without causing stress to your business. Our modular design allows our customer's maximum flexibility in choosing those capabilities which best meets their needs at a cost which meets their budget and the requirements of each particular site.

C-Store Commander
TAKES CARE OF IT ALL!

Point of Sale

Intuitive high-performance touch screen reduces training time & reduces errors. Full featured POS inclusive of speed keys, hot keys, tender screen and much more allow for the quick and efficient handling of customer purchases.

Pump Control

Full pump control including: Pay@Pump, Post-Pay, Pre-Pay Pre-set and Manual fuel sales. Operates with all major dispensers. Pump icons show real-time fuel sale activities. Price sign & tank monitoring integration.

Back Office

Policy driven complete store management and control system allows you to run your business your way. Define and regulate all aspects of store management, sales and inventory activities. Maximum control and flexibility is in your hands.

Head Office

Real time, real information. Push and pull data to and from stores. Gives you full management and control of your stores and everything you need to know about store operations, whether it be by individual store, region or enterprise.
