

Product Announcement

Date of Bulletin: November 3, 2009

Effective Date: Immediately

Part #: FRHA07515 (3/4" hose) / FRHA10020 (1" hose)

Part #: FRNA075DAU10 (3/4" nozzle) / FRNA100DAU00 (1" nozzle)

Effected Components: Hoses and nozzles

Subject: Release of Arctic Use Hoses and Nozzles

Issuing Authority: Marketing

It is with great pride and excitement that the **Fill-Rite** division of Tuthill Transfer Systems announces the release of the new "Arctic Duty" Hoses and Nozzles. Available in 3/4" and 1" sizes, these new products are designed specifically to function in extreme cold weather applications where conventional equipment cannot.

Special compounds used in the seals and hose material allow them to remain flexible to keep the fluids flowing even as temperatures reach -40 degrees (F/C).

Don't forget the swivels! Fill-Rite swivels make an excellent connection between hose and nozzle, and are also fully functional to -40 degrees!

The swivels are available in 3/4" (P/N S034H1311) and 1" (P/N S100H1312) sizes.

We have stock of Arctic hoses, nozzles, and swivels, and can ship immediately, so place your orders today! Don't wait for the weather to change! **Go Arctic! Go Fill-Rite!**
