

SS244CT Cold Temperature Aircraft Fueling Hose

The SS244CT Aircraft Fueling hose is designed to handle commercial and military aviation fuels in cold temperature environments. SS244CT meets or exceeds all requirements for aircraft fueling hose specified in API 1529/6th Edition 2005 Type C-CT, Grade 2 and is excellent for top deck reels and platform refuelers.

- Designed for commercial and military aviation fuels.
- Seamless high grade tube diminishes discoloration and contamination of fuels and fuel systems.
- Hydrostatically tested to 600 psi.

I.D.	O.D.	Working Pressure	Weight lb/ft.
2"	2 $\frac{1}{16}$ "	300	1.23
2 $\frac{1}{2}$ "	3 $\frac{3}{16}$ "	300	1.42
3"	3 $\frac{1}{16}$ "	300	1.71

Tube: Extruded high grade nitrile.
 Reinforcement: Multiple plies of synthetic fabric and polyester yarn.
 Cover: Specially compounded high grade nitrile.
 Temperature: -40° to +180° F.
 Lengths: Sold in coupled, tested, and certified lengths.
