Service Bulletin Priority 2

The information in this Service Bulletin applies to:

Dispensers
Passport
Veeder-Root
Gasboy
Red Jacket
Applause
Training

Summary

The following change has been to the Fueling Site Safety Training (required for all technicians in all product lines).

Details

If you are a technician installing or servicing any of the brands of Gilbarco, Inc. in North America, you are required to complete the GVR Fueling Site Safety Training annually.

A new version of this training has been released today and all old versions will be removed from your list of courses.

Anyone who has enrolled in the previous course, but has not completed this course will need to re-enroll in the new course at no charge through the GVR Learning Management System (LMS).

Here is the procedure:

1. Log into the LMS using your technician number and password (<http://wise.gilbarco.com>).
2. Click on the Self-Enrollment tab.
3. Click on the course entitled – (GVRSAFECA50-012) Fueling Site Safety – Canada or (GVRSAFEUS50-012) Fueling Site Safety – U.S., depending on which country you reside.
4. Click on icon that looks like a blank sheet of paper at the top of the window.
5. When you get the message asking if you want to add it to your courses, answer OK.
6. Return to your home screen and click on the folder for your country (U.S. or Canada). Your course should appear there.

NOTE: GVRSAFEUS40 and GVRSAFECA40 are no longer valid safety courses; however, if you have already renewed your safety certification, you will simply need to enroll in the new course prior to your expiration date.
