## **Dresser Wayne Introduces First Industry-Approved E85 Fuel Dispenser**

AUSTIN, TEXAS (May 31, 2006)—As interest in ethanol as a viable alternative fuel continues to rise, Dresser Wayne is introducing the industry's first Weights and Measures- and UL-approved E85 fuel dispenser. The Dresser Wayne Vista™ 387 E85 fuel dispenser brings the reliability of industry standards to the market, presenting new possibilities to renewable fuel retailers across the nation.

“Until now, retailers have been making the most of providing E85 to the market with non-certified dispensers,” says Scott Negley, Dresser Wayne’s director of product management. “In bringing certified dispensers to the market, we are able to offer retailers access to the E85 market with the reliability and investment protection of industry certification. At a time when legislation is providing significant economic incentives to E85 retailers, Dresser Wayne feels it is especially important to offer proven and certified equipment.”

Given current environmental and economic factors, the E85 market is in a growth stage. However, ethanol presents chemical challenges that require stringent equipment standards to withstand the fuel’s corrosive nature. To bring the best-in-class dispenser to the market, Dresser Wayne is partnering with CleanFUEL USA, recognized as a leader in the alternative fuels industry.

“We were glad to collaborate with a company so closely aligned with our philosophy of excellence and commitment to alternative fuel technology,” says Curtis Donaldson, president and COO of CleanFUEL USA and the acting chairman of the National Ethanol Vehicle Coalition (NEVC). “The impact of an industry-certified E85 dispenser has an immediate benefit to ethanol retailers – the guarantee that their dispensers have been subjected to rigorous testing and withstand up to years of performance. The release of the Dresser Wayne Vista 387 E85 dispenser now ensures compatibility with alternative fuels and helps realize the vision of the NEVC.”

Dresser Wayne expects to expand E85 certification to its Ovation® dispensers later this year.

“Dresser Wayne is poised to offer the market certified, reliable equipment to help retailers capitalize on economic incentives and help them capture a portion of the growing market of flex fuel vehicles, including those that accept E85,” Negley says. “The Vista 387 E85 dispenser is only the latest in a history of industry firsts for Dresser Wayne. This product is yet another strong testament of our commitment to provide advanced and reliable solutions to fuel retailers.”

### **About Dresser, Inc.**

Dresser, Inc. is a worldwide leader in the design, manufacture and marketing of highly engineered equipment and services sold primarily to customers in the flow control, measurement systems, and compression and power systems segments of the energy industry. Headquartered in Dallas, Texas, Dresser has a comprehensive global presence with approximately 6,500 employees and a sales presence in more than 100 countries worldwide. The company's website is [www.dresser.com](http://www.dresser.com).

### **About Dresser Wayne**

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc. and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel-blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payments systems and dispenser-mounted touchscreen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their businesses more efficiently, including inventory control, price book management, labor management and site administration. Dresser Wayne is a full corporate member of the National Ethanol Vehicle Coalition. The Dresser Wayne website is [www.wayne.com](http://www.wayne.com).
