Subject: DEF Trade sector

Diesel Exhaust Fluid (DEF) trade sector **1099** Other chemical products

When obtaining your ORA certificate, please make sure to select the correct trade sector, which is 1099 Other Chemical Products. This is because Diesel Exhaust Fluid (DEF) falls under the category of chemicals and is classified as such. **It's important to keep in mind that DEF is not a petroleum product** and only requires an initial inspection without any mandatory examinations.

Kind Regards/Cordialement,
