**Subject:** GILBARCO Dispenser Software

While you are conducting an examination on **Gilbarco Dispensers**(device type 50), make sure to check the **software version**. (You can do this by rebooting the system)

All software (PCN, ATC, etc.) should match the approved list of software from the latest revision of **the Notice Of Approval** for the device type.

If unapproved software is identified during your examination, you must update to the **approved version**, which is listed on the **latest NOA**.

Below is an **example** of approved PCN Software versions for Gilbarco Dispenser Encore 500, 500S, 550S, 700S, 800 & 900

(SOURCE: PAGE 17, AV-2372 REV. 22)

PCN Software for:   Logiciel MCP pour: Encore 500, 500S, 550S, 700S, 800 & 900
