Subject: Hydrometer Care
Attachments: Hydrometers' Care Guide.pdf

To all the IT's who ARE or WILL be using Hydrometers for propane examination:

Hydrometers are very fragile devices that we use to calculate the density of propane in our gravimetric propane provers. It would take about two years to replace a hydrometer!! So kindly take good care of them.

Please read the attached hydrometer care guide carefully

Kind Regards/Cordialement,

Zana Kamangar
