

## VAPOUR & LIQUID SERVICE VALVES, LIFT TRUCK CONNECTORS

### Vapour Cylinder Valves

**Marshall Excelsior Cylinder Valves** are intended for use in vapour withdrawal service for ASME and DOT containers or as fuel line shutoff valves. Comes complete with: One piece forged brass body construction, dual o-ring packing design, universal (easy to repair) bonnet assembly and heavy duty replaceable zinc hand wheel.

**Cavagna Cylinder Valves** are designed for vapour or liquid withdrawal service on ASME containers. Comes complete with heavy duty rugged forging, double o-ring seal for longer valve life, easy to grip large handwheel.

**Sherwood Cylinder Valves** for DOT cylinders incorporate an integral relief valve, forged brass body, non-rising nylon seat and a Teflon-coated stem assembly to ensure long operating life and a positive back seat. Valves with a PVE prefix are supplied with Everseal thread sealant as standard for reduced installation costs. The **3250AD** and **3329BLGT** series valves are used as a vapour service valve on DOT cylinders equipped with a separate relief valve. The **3250AD-7** valve, in particular, comes complete with a pre-tapped pressure test port.

**SCG 100# Cylinder Valves** come only in the 100 lb - POL variety, with diptube option.

NEE #	Type	Inlet Size	Relief Valve Setting	Outlet	Dip Tube Length	Application	Repair Kit
PV3250AD-7	Sherwood	3/4" NGT	No Relief	POL	None	200 and 420 Lb Cylinders	3250-8LH-KIT
PV3250CLM-11.6			375 PSI	CGA 555	11.6"	100 Lb Cylinders Liquid Withdrawal	
PVE3250BC-312			312 PSI	POL	None	ASME Motor Fuel Tanks	3329-13LH-KIT
PVE3250C-375			375 PSI		10.6"	100 Lb Cylinders	3250-8LH-KIT
